Zero Trust Application Access Release Notes

This document is the release notes for InstaSafe Zero Trust Application Access (ZTAA) features to be released on 19th March 2023. This document contains information on enhancements to app.instasafe.io console, ZTAA agent, ZTNA and the gateways which include feature enhancements and bugs resolved. In case of discrepancy between information given in release notes and Product documentation, information given in release notes is to be assumed correct.

- No new versions of ZTAA Agent or ZTNA or gateways are getting released

General Notes

1. Minor modifications and Bug Fixes not significantly affecting the user experience are not a part of the release notes.
2. Multiple bug fixes or enhancements relating to a particular feature are not separately featured in release notes.

Major Enhancements

Component	Enhancements
Console	- Enhancement for performance improvement to the AD Sync process. - Enhancement for Directory Sync Profile updates. - Enhancement to search and filter users based on User Groups in the Users screen. - Minor modifications to the OTP email content. - The permissible character limit for display name of users has been increased so that they don't fail in AD Sync. - Ability to search within a User Group with username.

Major Bug Fixes

Sl. No	Description
1	Issue with uploading large image files for web applications is fixed.
2	The Legacy IE mode toggle has been removed for web application.
3	Issue with Admin user able to disable/enable tenant owner using bulk action is fixed.
4	Minor UI fixes in the Access Policy page.
5	Minor UI fixes in the Account Information screen under My Profile.
6	Minor UI fixes in the Audit and Event reports.
7	Other minor issues in the console addressed.

Known Product Issues

1. If users have the ZTAA agent open when a new network application is added to the Access policy, then users will need to restart the agent for the application to show online in the agent. Until the agent is restarted, the newly added network application will be accessible from the network gateways but will show Offline/Grey in the agent.
2. Network applications will show unstable and will not be accessible when a user logs into the ZTAA agent from a Windows 8.1 Pro 32 bit or 64 bit machine. Network applications will be accessible only after clicking on the Refresh button in the agent.
3. MAC users who are on the production ZTNA version 4.13.0.0 will not get upgraded to the latest ZTNA version automatically. A system restart will need to be done for the latest ZTNA version to be upgraded.
4. The AD Sync Finished event is getting displayed twice in the AD Sync event reports.
