Zero Trust Application Access Release Notes

This document is the release notes for InstaSafe Zero Trust Application Access (ZTAA) features to be released on 09th January 2026. This document contains information on enhancements to Console and Unified Gateway which include feature enhancements and bug fixes.

General Notes

1. Minor modifications and bug fixes not significantly affecting the user experience are not a part of the release notes.

Major Enhancements

Component	Enhancements
Console	- **Display Associated Policies:** Error notifications during application deletion now show all linked policies, helping admins quickly identify and resolve dependencies. - **Azure Profile Token Alerts:** Added the ability to configure alerts to specific email addresses when the Azure profile refresh token expires, ensuring timely action and uninterrupted access. - **Bulk Local User Creation:** Added support for creating multiple local users via CSV/Excel upload, improving onboarding speed and reducing manual effort. - **Device List Loading Fix:** Resolved an issue where the device list in Perimeter Management failed to load. - **Log Truncation Fix:** VPN logs are now fully forwarded to SIEM without data loss.

Unified Gateway	- **Gateway Auto Update:** Enabled seamless auto updates for Unified Gateways.
