Zero Trust Application Access Release Notes

This document is the release notes for InstaSafe Zero Trust Application Access (ZTAA) features to be released on 11th October 2025. This document contains information on enhancements to Console which include feature enhancements and bugs resolved.

General Notes

1. Minor modifications and bug fixes not significantly affecting the user experience are not a part of the release notes.

Major Enhancements

Component	Enhancements
Console	- **Tenant Creation**: Auth V2 is now the default authentication mechanism. The outdated Auth V1 option has been removed from the admin console. - **User Account Management**: Re-enabling a disabled user account now resets authentication counters/flags (OTP, password, reset link attempts) to default values. - **UI Enhancements:** Multiple refinements made to the Admin Console UI for improved usability, consistency, and error handling. - **Security:** General improvements made to strengthen system stability and reduce potential attack surface.

Bug Fixes

Sl. No	Bug Fixes
1	Improved audit logging for security question authentication.
2	Corrected LDAP group mapping when Group Attribute is missing.
3	Strengthened policy expiry handling to prevent re-enabling expired policies.
4	Ensured application sessions terminate properly after user logout.
5	Resolved issue where the **ZTNA Client UI** was not invoked properly after credential entry, leading to repeated login prompts.
6	Fixed an issue where **Device Host Names** were missing in exported **User Devices reports**, ensuring more consistent and accurate reporting.
